Pharmacy context and inspection background

The community pharmacy is located on a parade of shops on a busy main road towards the outskirts of town. Its main activity is dispensing NHS prescriptions. The pharmacy supplies medicines for people living in care homes and it provides some medicines in multi-compartment compliance packs to help people take their medicines at the right time. The pharmacy provides a range of other NHS services including blood pressure testing, Pharmacy First, and a contraceptive service. It also offers private services such as travel vaccinations. Team members regularly provide healthcare advice and sell over-the-counter medicines.

This was a full routine inspection of the pharmacy. The pharmacy was last inspected in December 2015.

Standards not met

Standard 2.2

- Team members do not always receive appropriate accredited training for the roles in which they are working. This means they may have gaps in their skills and knowledge.

Standard 4.3

- The pharmacy fails to consistently store high-risk medicines in line with safe custody requirements. This is a safety concern and it increases the risk of loss or diversion.
- The pharmacy does not consistently check and record fridge temperatures for medicines that need cold storage, and fridges are not always clean and well organised. As a result, it cannot show that these medicines are kept in the right conditions or are safe to use.
