It provides a range of NHS services, including Pharmacy First, New Medicines Service and blood pressure check service. It also offers some seasonal vaccinations and private consultation services such as weight management. The pharmacy team uses automation to dispense some prescriptions. Standards that were met with areas for improvement

Standard 4.2

- The pharmacy makes appropriate checks before supplying prescription only medicines (POM) to people as part of the private services it offers. However, it does not always label medicines supplied as part of this service. This means people may not have all the information they need about how to use the medicine they receive, and the pharmacy's records are incomplete.
