Pharmacy context and inspection background

This is a traditional community pharmacy located within the village of Tarvin, Chester. It dispenses NHS and private prescriptions. And it provides medicines in multi-compartment compliance packs to help people take their medicines at the right times. The pharmacy offers a range of other services including the NHS Pharmacy First service, a substance misuse service and a home delivery service.

This was a full routine inspection of the pharmacy. The pharmacy was last inspected in November 2015.

Overall outcome: Standards not all met

Standards not met

Standard 1.6

- The pharmacy does not keep adequate records of high-risk medicines that are returned by people for destruction. This means the pharmacy does not have an accurate record to refer to if there was a query.

Standard 3.1

- Several areas of the pharmacy premises are significantly untidy and cluttered, which presents a risk in how the pharmacy delivers its services safely.

Standard 4.3

- The pharmacy does not correctly and securely store some high-risk medicines that are awaiting destruction. This increases the risk of unauthorised access to these medicines. And the pharmacy does not routinely check and record the temperature ranges of each of its fridges. So there is a risk that it may not identify when medicines that require cold storage are being stored at incorrect temperatures.

Standards that were met with areas for improvement

Standard 1.2

- The pharmacy's team members describe learning from mistakes made during the dispensing process and the changes they implement to improve patient safety. However, they do not record details of these mistakes. And so, they may miss the opportunity to identify any trends or patterns.
