### Standards that were met with areas for improvement

#### Standard 4.2

- The pharmacy supplies medicines in multi-compartment compliance packs to some people to help them take their medicines correctly. The packs are assembled by a hub pharmacy under the same ownership as the pharmacy and it generally does this in a safe and effective manner.

However, to help manage the workload, some packs are made in advance of the prescription being received. This may increase the risk of any medication changes being missed.
