### Standards not met

#### Standard 3.3

- Some areas of the pharmacy are in disrepair and present a health and safety risk to members of the team. Damp and mould are present on the top floor of the premises with stock medicines

being stored in this area.

## Standards that were met with areas for improvement

### Standard 1.2

- The pharmacy has procedures in place to deal with dispensing incidents and near misses, but these are not always followed, and team members do not always record their errors. This could make it harder for the team to review mistakes and identify any patterns or trends, and it could be missing out on opportunities to make the pharmacy's services safer.

### Standard 3.1

- The retail area of the pharmacy and dispensary are also aged and untidy which does not present a professional image.
