### Standards that were met with areas for improvement

#### Standard 1.6

- The pharmacy generally completes required records, but some private prescription entries are

inaccurate or incomplete, records of its higher risk medicines aren't always completed in line with requirements and balance checks of higher risk medicine stock are infrequent. This could make audit more difficult and increase the risk of discrepancies going unnoticed.

## **Standard 4.2**

- The pharmacy provides medicines in multi-compartment compliance packs to help people take their medicines. But they do not routinely provide patient information leaflets or include product descriptions. So people may not always have up to date information about their medicines.
