Pharmacy context and inspection background

This community pharmacy is located on a main road in an urban residential area. Its main activity is dispensing NHS prescriptions for people living locally and provides some people's medicines in multi-compartment compliance packs. The pharmacy provides other NHS services which includes substance misuse treatments, needle exchange, the New Medicine Service (NMS), Pharmacy First, hypertension case finding, and influenza vaccinations. It also has a home delivery service.

This was a routine inspection of the pharmacy which focused on the core Standards relating to patient safety. Not all the Standards were inspected on this occasion. The pharmacy was last inspected in April 2016.

Overall outcome: Standards met

Required Action: None

Standards that were met with areas for improvement

Standard 1.2

- The pharmacy team members do not always initial dispensing labels. This can make it more difficult to clarify who is responsible for preparing each prescription medication which may hinder

investigating and managing mistakes.

Standard 1.7

- The pharmacy generally keeps people's confidential information safe. However, archived confidential paperwork is not always stored securely. So, there is a small risk of unauthorised access to people's details.

Standard 1.8

- The pharmacy assesses compliance pack patient's needs, including whether to limit them to seven-day supplies where necessary. But these assessments are sometimes undocumented or difficult to retrieve. So, the pharmacy may have difficulties demonstrating the effectiveness of these reviews.

Standard 4.2

- The pharmacy has suitable processes and keeps appropriate records to provide compliance packs safely. However, the team does not always include descriptions of each medicine contained inside each compliance pack, which may make it more difficult for people to identify them.

Standard 5.1

- Team members serving at the counter were unable to access electronic records directly, relying instead on computer terminals located in the dispensary. These terminals were frequently in use, leading to delays in retrieving necessary information, and consequently some delay to people receiving services.
