Pharmacy context and inspection background

Independently owned local community pharmacy in Hampton. One of two owned by the same company. The pharmacy offers a core range of services including dispensing prescriptions and selling a range of health and pharmacy related products. The pharmacy also provides medicines in multi compartment compliance packs to people who need them. And it delivers medicines to those who are unable to obtain their medicines another way.

This was an inspection of the pharmacy which focused on the core Standards relating to patient safety. Not all Standards were inspected on this occasion. The pharmacy was last inspected in April 2016.

Overall outcome: Standards met

Required Action: None

Standards that were met with areas for improvement

Standard 1.6

- The pharmacy keeps the records it needs to. But not all of its records are complete and up to date. This means that it may not be able to provide enough good quality information if a problem

arises.

Standard 2.1

- While the pharmacy team is up to date with its immediate tasks it may not have enough suitably trained and skilled team members to complete all its other important tasks. This means that the team could easily fall behind and then find it harder to manage all the pharmacy's services safely and effectively.

Standard 4.3

- In general the pharmacy manages its medicines safely and effectively. But a small number of medicines had not been subject to routine checks. And had not been stored or packaged appropriately. This means that, while the risk is low, there is a chance that these medicines could be supplied inappropriately.

Principle 1: The governance arrangements safeguard the health, safety and wellbeing of patients and the public
