Standards not met

Standard 1.2

- This pharmacy does not always record its near misses, errors and other incidents when dispensing. This means the pharmacy team cannot always identify patterns or trends and take steps to reduce the risk of similar problems happening again.

Standards that were met with areas for improvement

Standard 1.6

- The pharmacy generally keeps records as required, however some entries in its private prescription register do not always contain prescriber details, which may make it harder for the pharmacy to manage any queries it may receive about these.

Standard 4.2

- The pharmacy has the correct written procedures for supplying high risk medicines, but these are not always followed each time. This makes it harder for the pharmacy to show that it has checked these medicines are still suitable and that people have been counselled appropriately or that they have recorded some of the monitoring information.
