Standards not met

Standard 1.6

- The pharmacy does not keep all its record in the way the law requires. And many of its records are incomplete. This means that it may not be able to account for all its activities day to day. This includes activities around the medicines it receives and supplies. This means that if something went wrong it would be difficult for the team to establish what happened and why. And it would

be difficult to rectify it. This also means that it would be difficult for the pharmacy to demonstrate that it monitors its activities safely and appropriately.

Standard 4.3

- The pharmacy does not do enough to ensure that all its medicines are managed safely and securely. And in the way the law requires. This means that it may not be able to account for all the medicines it should and keep them safe.

Standards that were met with areas for improvement

Standard 2.3

- While staff can raise concerns within the team, the pharmacy could be more active in seeking input from its team members. This means that it is missing opportunities to improve.

Standard 3.1

- While the pharmacy is planning an upgrade, some of its fixtures are not secure. Several of the pharmacy's storage drawers are broken. This means there is a chance that they could fall out, causing a risk to staff and the safe storage of medicines.
