Standards that were met with areas for improvement

Standard 1.2

- Although the pharmacy keeps a record of the mistakes its team members make, it doesn't keep a record of what it has learned or of any regular reviews it may carry out. This makes it harder for them to show if there are any patterns or trends and what they have changed as a result.

Standard 1.6

- Although the pharmacy keeps all the necessary records for the safe provision of its services, some of them do not always include all the required details. The pharmacy is not always including patient and prescriber details on the paperwork for its unlicensed medicines. Nor does it always record the details of people returning unwanted controlled drugs for safe disposal. This makes it harder to follow up any queries or problems which may occur in the future.
