Pharmacy context and inspection background

This pharmacy is part of the Pearl Chemist Group which owns a number of pharmacies mainly in and around southwest London. It dispenses people's prescriptions, sells over-the-counter medicines and offers healthcare advice. It also provides a number of other NHS services including Pharmacy First and a health-check service. Its private services include travel vaccinations and weight loss.

This was a routine inspection of the pharmacy which focused on the core Standards relating to patient safety. Not all the Standards were inspected on this occasion. The pharmacy was last inspected in November 2016

Overall outcome: Standards met

Required Action: None

Areas of good practice

Standard 1.2

- The pharmacy's team members keep good records of the mistakes they make. They regularly review them and keep detailed records of those reviews, including the actions they take to help prevent those mistakes from happening again. They also share learnings with other pharmacies

within the group to learn from each other and help improve their service.

Standards that were met with areas for improvement

Standard 1.6

- Although the pharmacy generally keeps the records it is expected to, some of them are not always complete. Prescriber details are missing from some of its private prescription records, and also from some of the records it keeps of unlicensed medicines that it dispenses. These gaps in their records could make it harder for them to properly look into any queries that may arise in the future.
