Standards that were met with areas for improvement

Standard 2.1

- The pharmacy has enough team members to manage its workload. But it is relying on a different locum pharmacist almost every day to operate. So, this could make it harder for the team to operate as efficiently as it could with a regular pharmacist who would more be familiar with the pharmacy. The pharmacy also occasionally has to close if a locum pharmacist cannot be sourced.

So, this could cause delays to people receiving their medicines. However, team members have said that the pharmacy head office are supportive in arranging pharmacist cover.
