Pharmacy context and inspection background

The pharmacy is in a row of shops within a residential area of Dunston, Gateshead. It dispenses NHS prescriptions, and it provides some people with medicines in multi-compartment compliance packs, to help them take their medicines. Pharmacy team members sell a range of over-the-counter medicines and provide services such as the NHS Pharmacy First service. And they deliver medicines to people's homes.

This was a full routine inspection of the pharmacy. The pharmacy was last inspected in July 2022 and all standards were met.

Overall outcome: Standards not all met

Standards not met

Standard 1.2

- The pharmacy does not adequately monitor and control the risk of providing all of its services, as it does not always make meaningful records of mistakes made when dispensing medicines. And actions taken in response to these are not always implemented. This means team members may miss opportunities to identify repeated mistakes and share learning.

Standards that were met with areas for improvement

Standard 1.6

- The pharmacy holds most of its records as required by law. But for private prescriptions, its team members do not always make records in a timely and consistent way. These gaps in record keeping may make it more difficult for the pharmacy to respond to queries that arise.

Standard 3.2

- The pharmacy has a good-sized consultation room that is suitable for delivering its clinical services. But the door to the consultation room has a large, uncovered clear glass window facing the retail area. So people's privacy when using the consultation room may be compromised.
