Pharmacy context and inspection background

This pharmacy is located in a parade of shops in a busy road. The pharmacy provides NHS services such as dispensing prescriptions, flu vaccinations and the Pharmacy First service. The pharmacy supplies medicines in multi-compartment compliance packs to people who need this support to manage their medicines at home, and it offers a delivery service. The pharmacy also runs a travel clinic using patient group directions (PGDs).

This was a full intelligence-led inspection of the pharmacy following information received by the GPhC. The pharmacy was last inspected in February 2017 when it was under different ownership.

Overall outcome: Standards met

Standards that were met with areas for improvement

Standard 1.6

- The pharmacy generally keeps the records it needs to by law. But some of its records are incomplete and do not contain the required information. The pharmacy does not always record

the prescriber's details for private prescriptions it dispenses. It does not always make a record about controlled drugs people have returned in a timely way. And its responsible pharmacist record does not always show the time the responsible pharmacist signed out.

Standard 3.1

- Although the pharmacy has sufficient space for the team to work with designated dispensing and checking areas, it could do more to keep the dispensary clean and clear of unnecessary items.

Standard 3.2

- The pharmacy has a consultation room which provides a degree of privacy. But there is a narrow gap between the doors and they do not provide good soundproofing. So, this may make the room less able to protect people's privacy in some circumstances.
