Pharmacy context and inspection background

This is a community pharmacy on a main road in North London. It primarily provides NHS services such as dispensing. And it supplies medicines in multi-compartment compliance packs to people who need this additional support. It provides an occasional private prescribing service using a pharmacist independent prescriber. The pharmacy offers a delivery service to some local people.

This was a routine inspection of the pharmacy which focused on the core Standards relating to patient safety. Not all the Standards were inspected on this occasion. The pharmacy was last inspected in December 2015.

Overall outcome: Standards not all met

Required Action: Improvement Action Plan

Standards not met

Standard 1.2

- The pharmacy provides a prescribing service, but it has not undertaken any audits about it. So, it cannot sufficiently demonstrate that it monitors the safety and quality of this service.

Standards that were met with areas for improvement

Standard 1.6

- The pharmacy checks the physical stock of its controlled drugs against its records when it receives or dispenses them. But it doesn't complete regular checks of medicines that have not been dispensed for some time. This may make it difficult to identify stock irregularities or mistakes in a timely manner.

Standard 4.2

- The pharmacy supplies valproate medicines in multi-compartment compliance packs. Although it has assessed the risks and benefits to the person, it does not always document this in an individual risk assessment. So, the pharmacy may be less able to show that it has undertaken the necessary checks if there was a query.
