Standards that were met with areas for improvement

Standard 1.2

- The pharmacy keeps records of the mistakes its team members make. But it doesn't regularly review these, so team members may be missing opportunities to spot patterns or trends and take effective action to help prevent the same sort of things happening again.

Standard 3.1

- The pharmacy would benefit from a refit. It's generally maintained to an acceptable standard. But its consulting room isn't always accessible to people who have difficulty in climbing stairs, and its dispensary could be made bigger to give its team more space to work in. There are some maintenance concerns with its flooring that require attention. These things could impact on the overall professional image of the pharmacy.

Standard 4.2

- The pharmacy team often forgets to supply packaging leaflets with the compliance packs it dispenses. This means that people don't always have all of the information they need to take their medicines safely.

Standard 4.4

- The pharmacy receives drug safety alerts and recalls. But it doesn't always keep records to show that these have been actioned. This makes it harder for the pharmacy to demonstrate it has taken appropriate action in response to safety alerts and recalls.
