### Standards not met

#### Standard 1.6

- The pharmacy does not maintain its records as required by law. It does not maintain a responsible pharmacist record to show who is responsible for the safe and effective running of the pharmacy.

## Standards that were met with areas for improvement

### Standard 1.2

- The pharmacy team can describe some changes they make following dispensing mistakes identified within the pharmacy, to reduce the risk of them happening again. But they do not consistently record dispensing mistakes when they happen, or the actions they take. So team members may miss opportunities to learn when things go wrong.

### Standard 4.3

- The pharmacy's fridges were operating within the recommended limits at the time of inspection. But the pharmacy does not consistently monitor and record the temperatures of its fridges to ensure medicines remain safe for people to use.
