Pharmacy context and inspection background

This is a pharmacy on a high street in the seaside village of Prestonpans in Lothian. Its main activities are dispensing NHS prescriptions and providing some people with their medicines in multi-compartment compliance packs to help them take their medicines properly. It delivers medicines to some people in their homes. And it provides NHS services such as NHS Pharmacy First.

This was a reinspection following an inspection December 2024 where the pharmacy did not meet Standards 1.1, 1.2 and 4.3. This reinspection focused on those Standards which had previously not been met and the core Standards relating to patient safety. Not all the Standards were inspected on this occasion. Since the last inspection, team members are recording and learning from the dispensing mistakes they make, and the pharmacy has made appropriate improvements as to how it stores medicines safely. But the pharmacy doesn't have a full range of up-to-date written procedures available for the team.

Overall outcome: Standards not all met

Required Action: Improvement Action Plan

Standards not met

Standard 1.1

- Pharmacy team members describe the processes they follow to reduce the risk in the activities they carry out. But, at the time of the inspection, they still do not have complete set of written procedures for the activities they complete. The superintendent pharmacist has recently reviewed the standard operating procedures, but these have still to be shared with team members for them to read. So the pharmacy cannot show how it ensures team members work consistently and provide services safely. This was similar at the last inspection, and the pharmacy has failed to fully make the improvements indicated in the action plan issued following the last inspection.
