Pharmacy context and inspection background

This is a community pharmacy in Bellshill in Lanarkshire. Its main activities are dispensing NHS prescriptions and providing medicines to people in multi-compartment compliance packs to help them take their medicines safely. It provides a range of services including NHS Pharmacy First, NHS Pharmacy First Plus and private services including travel vaccinations and weight loss.

This was a full routine inspection of the pharmacy. The pharmacy was last inspected in March 2017.

Overall outcome: Standards met

Standards that were met with areas for improvement

Standard 1.1

- Overall, the pharmacy provides its NHS and private services safely. And while team members can demonstrate the processes they follow to provide services safely, these are not always documented formally. And not all team members have read the written procedures available. This may make it hard for the pharmacy to deliver its services consistently.

Standard 1.2

- The pharmacy records some details about mistakes made during the dispensing process such as the medicine involved. But they do not consistently record the details about the mistakes. And they do not always review the near misses to help identify trends to take suitable action to help prevent mistakes from happening again.

Standard 4.3

- The pharmacy completes some date checking. And team members highlight medicines going out of date in the next few months. But they do not keep records of completed date checking to help show that date checking is completed regularly. And one out of date medicine was found on the pharmacy shelves. Similarly, records of fridge temperatures are kept, but temperatures are not always recorded consistently so it may be difficult to show that medicines are always stored appropriately.
