### Standards that were met with areas for improvement

#### Standard 1.6

- The pharmacy mostly maintains accurate records of the supplies it makes against private prescriptions. But it stores its private prescriptions in an unorganised manner. This increases the risk of errors in record keeping and may make it difficult to resolve any queries.

### Standard 4.3

- The pharmacy securely stores its higher-risk medicines that are awaiting destruction. But there are a high number of these awaiting destruction which limits storage space. This may increase the risk of an error occurring.
