Pharmacy context and inspection background

The pharmacy is in a row of shops in a residential area of Glasgow. It dispenses NHS prescriptions and sells a range of over-the-counter medicines. The pharmacy also provides medicines to some people in multi-compartment compliance packs to help them take their medicines properly. And they deliver medicines to some people's homes. Pharmacy team members provide other healthcare services including the NHS Pharmacy First Service and NHS Pharmacy First Plus Service.

This was a routine inspection of the pharmacy which focused on the core Standards relating to patient safety. Not all the Standards were inspected on this occasion. The pharmacy was last inspected in February 2016.

Overall outcome: Standards met

Standards that were met with areas for improvement

Standard 1.1

- There are a range of written procedures for team members to follow. But these have not all been signed by the superintendent pharmacist when they were reviewed. So it is not always clear who

reviewed the procedures, and when they are next due to be reviewed.

Standard 1.2

- Pharmacy team members discuss mistakes they make during the dispensing process but do not formally document these. So they may miss opportunities to review and reflect on these incidents and improve their services.

Standard 4.2

- Multi-compartment compliance packs do not contain descriptions of the medicines inside the packs, so people may find it difficult to identify their medicines.
