Pharmacy team members provide other healthcare services including the NHS Pharmacy First Service.

This was a full intelligence-led inspection of the pharmacy following information received by the GPhC. The pharmacy was last inspected in March 2017.

Standards not met

Standard 4.3

- The pharmacy does not follow its expiry-date checking process for its stock medicines, and there are short-dated and out-of-date medicines stored on its shelves. This increases the risk of

someone receiving medicines which have expired

Standards that were met with areas for improvement

Standard 2.2

- Team members complete registered training appropriate to their role, but they are not completing training to help improve their skills and knowledge in all areas of the pharmacy. This includes for the management of the busy multi-compartment compliance pack service. So the pharmacy may not have trained team members to complete all tasks during periods of unplanned absence.

Standard 4.2

- The pharmacy uses an offsite hub to assemble some of its medicines which does not provide people with patient information leaflets so people may not have access to up to date information about their medicines.
