Standards that were met with areas for improvement

Standard 4.2

- The pharmacy supplies some medicines in multi-compartment compliance aid packs. The backing sheets on compliance packs do not always contain the details of medication warning labels. So people may not have all the information they need to help them take their medicines safely.

Standard 4.4

- The pharmacy has a system to receive some alerts for the recall of faulty medicines and medical devices. But it does not keep a robust audit trail. So, it cannot always demonstrate that alerts are reviewed and actioned within an appropriate timeframe.
