Pharmacy context and inspection background

This pharmacy is situated in the middle of the main market street through Llangefni, Gwynedd. It dispenses NHS prescriptions, private prescriptions and sells over-the-counter medicines. It also provides a range of services including emergency hormonal contraception, independent prescribing service (IPS) and a weight loss service via a private patient group direction (PGD). The pharmacy supplies medicines in multi-compartment compliance packs to some people to help them take their medicines at the right time.

This was a full routine inspection of the pharmacy. The pharmacy was last inspected in September 2015.

Overall outcome: Standards met

Required Action: None

Standards that were met with areas for improvement

Standard 1.6

- The pharmacy's private prescriptions records are largely complete but some important details, such as the prescriber's information are inaccurate. So, the pharmacy may not always have access

to accurate information or be able to respond appropriately to any concerns or queries.

Standard 4.3

- The pharmacy provides medicines in multi-compartment compliance packs to help people take their medicines. But they do not routinely provide patient information leaflets each time with their medicines. So, people may not always have up to date information about their medicines.
- The pharmacy generally keeps records of fridge temperatures to help ensure medicines are stored appropriately. However, the temperature records are not always complete. This may make it harder for the pharmacy to provide assurance that medicines have consistently been stored within the required temperature range.
- The pharmacy has arrangements in place to store high-risk medicines securely. However, not all storage facilities are consistently managed or secured as intended. This reduces assurance that all high-risk medicines are always appropriately stored and safeguarded from unauthorised access.
