General Pharmaceutical Council

Registered pharmacy inspection report

Pharmacy Name: P W & J A Hedge Ltd, The Pharmacy, Drummer

Lane, TIDWORTH, Hampshire, SP9 7FH

Pharmacy reference: 1089954

Type of pharmacy: Community

Date of inspection: 28/06/2019

Pharmacy context

This is a community pharmacy located adjacent to a medical centre in Tidworth. It serves a mixed local population including army personnel and young families. The pharmacy opens six days a week. The pharmacy sells a range of over-the-counter medicines, dispenses NHS prescriptions and supplies medicines in multi-compartment compliance aids for people to use living in their own homes and also care homes.

Overall inspection outcome

✓ Standards met

Required Action: None

Summary of notable practice for each principle

Principle	Principle finding	Exception standard reference	Notable practice	Why
1. Governance	Standards met	N/A	N/A	N/A
2. Staff	Standards met	N/A	N/A	N/A
3. Premises	Standards met	N/A	N/A	N/A
4. Services, including medicines management	Standards met	N/A	N/A	N/A
5. Equipment and facilities	Standards met	N/A	N/A	N/A

Principle 1 - Governance ✓ Standards met

Summary findings

The pharmacy has written procedures to help make sure the team works safely. Pharmacy team members record and review some mistakes that happen and use this to learn from their mistakes. Pharmacy team members are clear about their roles and responsibilities. The pharmacy asks its customers and staff for their views and uses this to improve services. It manages and protects people's confidential information and it tells people how their private information will be used. The pharmacy generally maintains all the records that it must keep by law. However, details were missing from some of its records. This means the pharmacy may not have a complete audit trail or be able to show exactly what has happened if any problems arise.

Inspector's evidence

Processes were in place for identifying and managing risks. Near misses were recorded regularly and records of these were kept in the dispensary. The pharmacist reported that these were reviewed monthly, although the team reported that they had not noticed any specific trends in errors.

There was a procedure for dealing with dispensing errors detailed in the standard operating procedures (SOPs). The pharmacist demonstrated that dispensing errors were recorded electronically and included an investigation as to why the error had occurred. Dispensing errors were also reported to the superintendent pharmacist.

There was an established workflow in the pharmacy where labelling, dispensing and checking activities were carried out at dedicated areas of the workbenches. Dispensing labels were also seen to have been signed by two different people indicating who had dispensed and who had checked a prescription.

Standard operating procedures (SOPs) were in place for all the dispensary tasks and these were reviewed regularly. On questioning, the staff were all able to explain their roles and responsibilities.

A complaints procedure was in place and the staff were all aware of this. The pharmacy carried out a Community Pharmacy Patient Questionnaire (CPPQ) annually to gather feedback from people about their services.

An indemnity insurance and public liability certificate from NPA was displayed and was valid and in date until the end of January 2020. Records of controlled drugs (CD) and patient returned CDs were seen as being kept. A sample of a random CD was checked for record accuracy and was seen to be correct. CD balance checks were carried out infrequently with only two balance checks since January at the time of the inspection. The pharmacist agreed to address this.

Staff reported that date checking was carried out regularly and some records were kept to demonstrate this. A short dated stock list was also kept. The fridge temperatures were recorded daily and were always in the 2 to 8 degrees Celsius range.

A responsible pharmacist (RP) record was retained but entries had not been made for four days at the time of the inspection. The pharmacist reported that he would ensure that the RP records were kept up to date in future. The responsible pharmacist notice was displayed in pharmacy where patients could

see it.

The private prescription records were retained but some entries omitted the prescriber's details. The emergency supply records were retained and were in order. The specials records were retained but some entries omitted the prescriber's address.

Staff were seen to be following the company information governance policy. Staff signed confidentiality agreements. Confidential waste was separated and shredded intermittently using cross cut shredders. The computer screens were all facing away from the public and access to patient confidential records was password protected.

Staff explained that they were aware what signs to look out for that may indicate safeguarding issues in children and vulnerable adults. Contact details were available for safeguarding referrals, advice and support.

Principle 2 - Staffing ✓ Standards met

Summary findings

The pharmacy staff have the appropriate skills, qualifications and training to deliver services safely and effectively. The pharmacy team members work well together. They are comfortable about providing feedback and raising concerns and are involved in improving pharmacy services.

Inspector's evidence

There was one pharmacist, one dispensing assistant and one medicine counter assistant present during the inspection. They were all seen to be working well together. The pharmacy was short staffed on the day of the inspection due to two staff members being on holiday. Despite this, staff were able to keep up with the services provided during the inspection.

Staff meetings would take place monthly where any significant errors and learning would be discussed with the team. There was an ideas board in the dispensary where staff could communicate any learning ideas to other member of the pharmacy team.

The staff reported that they kept their knowledge up to date by reading third party materials and would ask the pharmacist if they had any queries. The pharmacy team had recently updated themselves on the new requirements when dispensing sodium valproate.

Staff reported that they felt comfortable to approach the superintendent pharmacist with any issues regarding service provision. There were no formalised targets in place in the pharmacy.

Principle 3 - Premises ✓ Standards met

Summary findings

The pharmacy generally provides a safe and appropriate environment for the provision of pharmacy services. The pharmacy team generally protects people's private information and the pharmacy is secure and protected from unauthorised access.

Inspector's evidence

The pharmacy retail area towards the front and a dispensary area toward the back which was separated from the retail area by a medicines counter to allow for the preparation of prescriptions in private.

There was retail stock and assembled prescriptions stored on the floor in the dispensary that may represent a trip hazard to staff. The risks of storing assembled prescriptions on the floor was highlighted to the pharmacist.

There was a sink available in the dispensary with hot and cold running water with sanitiser to allow for hand washing. Medicines were stored on the shelves in a generic and alphabetical manner and these were being rearranged during the inspection.

The pharmacist reported that the consultation room was not often used. Confidential waste that was due to be shredded was stored on top of the shredder in the consultation room and the pharmacist agreed to address this before the consultation room was used. There was retail stock stored in the consultation room and this did not represent the most professional image to patients.

The ambient temperature was suitable for the storage of medicines and the lighting throughout the store was appropriate for the delivery of pharmacy services.

Principle 4 - Services ✓ Standards met

Summary findings

Pharmacy services are accessible, effectively managed and safely delivered, pharmaceutical stock is generally appropriately obtained, stored and supplied. Where a medicinal product is not fit for purpose, the team take appropriate action.

Inspector's evidence

Pharmacy services were displayed on a board in the pharmacy. Access to the pharmacy was step free. There was space for the movement of a wheelchair or pushchair in the pharmacy and seating for patients and customers who were waiting. Large print labels were available for patients with sight difficulties.

The pharmacy team had an awareness of the strengthened warnings and measures to prevent against valproate exposure during pregnancy. However, valproate patient cards were not available for use during valproate dispensing to all patients who may become pregnant. The pharmacist reported that he would check that that the patient's prescriber had discussed the risks of exposure in pregnancy with them and they are aware of these and query if they were taking effective contraception.

There were destruction kits available for the destruction of controlled drugs and designated bins for storing waste medicines were available and being used for the disposal of medicines returned by patients. A hazardous medicines waste bin was also available for use. Waste collection was regular and the team explained they would contact the contractors if they required more frequent waste collection.

The pharmacy was European Falsified Medicines Directive (FMD) compliant. The relevant equipment was in place and the pharmacy was using the appropriate software.

Medicines were obtained from suppliers such as AAH, Alliance and Phoenix. Specials were obtained via suppliers such as Alliance and Elite pharma. Medicines and medical devices were stored within their original manufacturer's packaging. Pharmaceutical stock was subject to date checks which were documented and up to date. Short dated products were appropriately marked.

The fridge was in good working order and the stock inside was stored in an orderly manner. MHRA drug alerts and recalls came to the pharmacy electronically and the pharmacist explained that these were actioned appropriately. Full audit trails to demonstrate this were not always kept and the pharmacist agreed to address this.

Principle 5 - Equipment and facilities ✓ Standards met

Summary findings

The pharmacy has the appropriate equipment and facilities to provide the services offered. The pharmacy uses its facilities to protect patient privacy.

Inspector's evidence

There was a satisfactory range of crown stamped measures available for use. Measures were seen to be clean. Amber medicines bottles were seen to be capped when stored and there were counting triangle and a capsule counter available for use. Electrical equipment appeared to be in good working order and was PAT tested annually. Pharmacy equipment was seen to be stored securely from public access.

Up to date reference sources were available in the dispensary and the consultation room and included a BNF, a BNF for Children and a Drug Tariff. Internet access was also available should the staff require further information sources.

There was one fridge in use which was in good working order and the maximum and minimum temperatures were recorded daily and were seen to always be within the correct range. Designated bins for storing waste medicines were available for use and there was sufficient storage for medicines. The computers were all password protected and patient information was safeguarded.

What do the summary findings for each principle mean?

Finding	Meaning	
✓ Excellent practice	The pharmacy demonstrates innovation in the way it delivers pharmacy services which benefit the health needs of the local community, as well as performing well against the standards.	
✓ Good practice	The pharmacy performs well against most of the standards and can demonstrate positive outcomes for patients from the way it delivers pharmacy services.	
✓ Standards met	The pharmacy meets all the standards.	
Standards not all met	The pharmacy has not met one or more standards.
