Pharmacy context and inspection background

This is a health centre pharmacy in a suburban residential area, serving the local population. It mainly prepares NHS prescription medicines. A large number of people also receive their medicines in weekly multi-compartment compliance packs to help make sure they take them safely. The pharmacy provides other NHS services including the New Medicine Service (NMS), pharmacy first, influenza vaccinations, hypertension case finding, and oral contraception. It also has a home delivery service.

This was a routine inspection of the pharmacy which focused on the core Standards relating to patient safety. Not all the Standards were inspected on this occasion. The pharmacy was last inspected in August 2015.

Overall outcome: Standards met

Required Action: None

Standards that were met with areas for improvement

Standard 1.6

- The pharmacy keeps an electronic record of the responsible pharmacist (RP). However, the RP

does not always document when they ceased working in this role. So, the pharmacy may have difficulties identifying the RP if needed.

Standard 1.7

- The pharmacy does not always secure people's electronic confidential information. So, there is a risk that unauthorised persons may easily view these details.

Standard 4.3

- The pharmacy regularly checks medicine stock expiry dates. But it does not always retain the records of these checks. So, the pharmacy may have difficulties verifying these checks in the event of a query.
