Pharmacy context and inspection background

This is a community pharmacy situated in the same building as a large medical centre on a main road into Brighton. The pharmacy provides NHS services such as dispensing, the Pharmacy First service, and smoking cessation. It offers a travel clinic provided vaccinations against prescriptions issued by company prescribers. And it has a private prescribing service where a company prescriber would issue a prescription, and the person would collect the medicine from the pharmacy. Conditions prescribed for included weight loss and erectile dysfunction. The pharmacy offers a home delivery service, and many of its prescriptions are dispensed by its offsite hub. The pharmacy also supplies medicines in multi-compartment compliance packs for those people who need this additional support.

This was a routine inspection of the pharmacy which focused on the core Standards relating to patient safety. Not all the Standards were inspected on this occasion. The pharmacy was last inspected in December 2015.

Overall outcome: Standards met

Required Action: None

Standards that were met with areas for improvement

Standard 1.6

- The prescriptions issued as part of the pharmacy's prescribing service do not always contain the required details. For example, they do not always include the address of the prescriber. Or an indication about the kind of prescriber who had issued the prescription, such as a pharmacist independent prescriber or a doctor.
- The pharmacy generally keeps the records it needs to. But it does not always record the nature of the emergency for emergency supplies it makes. And it does not always record the name of the prescriber when dispensing a private prescription. So, these records may be less useful if there was a future query.
