Pharmacy context and inspection background

This busy supermarket pharmacy is within a small retail park on the outskirts of Mansfield in Nottinghamshire. Its main services include dispensing NHS prescriptions and selling over-the-counter medicines. It provides NHS consultation services including the Pharmacy First Service, blood pressure checks, Pharmacy Contraception Service, and the New Medicine Service (NMS). It also provides some private vaccination consultation services to people, including COVID-19 vaccines and chickenpox vaccines.

This was a routine inspection of the pharmacy which focused on the core Standards relating to patient safety. Not all the Standards were inspected on this occasion. The pharmacy was last inspected in February 2016.

Overall outcome: Standards met

Required Action: None

Standards that were met with areas for improvement

Standard 1.2

- Pharmacy team members act to correct and discuss mistakes found during the dispensing

process. But they do not always record these mistakes or review them. So, they may be missing opportunities to identify patterns and share learning to help prevent similar mistakes occurring.

Standard 3.2

- The pharmacy has a consultation room where people can have a private conversation with a team member. But the team do not always keep the room tidy which detracts from the overall professional image of the pharmacy.
