### Pharmacy context and inspection background

The pharmacy is on a main road alongside other retail businesses in Lostock Gralam, near Northwich. It mainly dispenses NHS prescriptions and sells over-the-counter medicines. It provides some NHS services such as the new medicine service.

This was a routine inspection of the pharmacy which focused on the core Standards relating to patient safety. Not all the Standards were inspected on this occasion. The pharmacy was last inspected in April 2016.

### Standards not met

#### Standard 1.1

- The pharmacy does not have one complete and up-to-date set of standard operating procedures for the services it provides. And not all team members have read, or signed to say they have read

the procedures which are available. Team members do not always follow the process described in the procedures, this includes for dispensing medicines in multi-compartment compliance packs and the frequency of checking higher risk medicine stock against register balances.

### **Standard 1.7**

- The pharmacy team do not have a readily accessible written procedure to follow to manage confidential information, and they don't have training records to provide assurance of their knowledge. The pharmacy doesn't always dispose of confidential waste appropriately as some private information is found in general waste bins.

## **Standards that were met with areas for improvement**

### **Standard 2.2**

- The pharmacy has experienced and knowledgeable team members who have the right training for their role. But it doesn't provide structured or regular ongoing training to help team members keep their knowledge up to date.

## Principle 1: The governance arrangements safeguard the health, safety and wellbeing of patients and the public
