Pharmacy context and inspection background

This pharmacy is on a busy main road leading into Doncaster in South Yorkshire. Its main services include dispensing NHS prescriptions, selling over-the-counter medicines and providing NHS consultation services including the Pharmacy First service, blood pressure checks, Pharmacy Contraception Service, and the New Medicine Service. The pharmacy provides private consultations for a range of conditions including weight management, and travel health. It dispenses some medicines in multi-compartment compliance packs for people, and it provides a medicine delivery service.

This was a routine inspection of the pharmacy which focused on the core Standards relating to patient safety. Not all the Standards were inspected on this occasion. The pharmacy was last inspected in August 2016.

Overall outcome: Standards met

Required Action: Not Required

Standards that were met with areas for improvement

Standard 4.3

- The pharmacy generally manages its medicines safely. But it stores a small number of its

medicines outside of the manufacturer's original packaging without full information on the secondary container. This means it would be difficult to check expiry dates and respond accurately to medicine recalls. Its team members conduct regular checks of both fridge temperatures and expiry dates of medicines. But they do not always keep a record of these checks to support them in responding to any queries or concerns that may arise.
