Pharmacy context and inspection background

This distance-selling pharmacy is located on a main road in a semi-rural residential area. It is one of two pharmacies operated by the same company, which are co-located at the same site. The pharmacy mainly supplies NHS prescription medicines, and it has a home delivery service. Some people receive their medicines in weekly multi-compartment compliance packs to help make sure they take them safely. The pharmacy operated via the website medicinesbypost.co.uk.

This was an intelligence-led inspection of the pharmacy following information received by the GPhC. Not all the Standards were inspected on this occasion. The pharmacy was last inspected in September 2024 and all Standards were met.

Overall outcome: Standards met

Required Action: None

Standards that were met with areas for improvement

Standard 1.6

- The pharmacy's dispensing labels do not specify the exact address of the pharmacy. So, people

may have difficulties identifying which of the two pharmacies located at the same address has supplied their medication.

Standard 1.8

- The pharmacy checks if people using a compliance pack require any additional support managing their medicines, including if they should be limited to seven-day supplies. However, these checks are undocumented, so the pharmacy may have difficulties demonstrating how effectively it has supported these people in the event of a query.

Principle 1: The governance arrangements safeguard the health, safety and wellbeing of patients and the public

Summary outcome: **Standards met**
