Date of inspection: 27/10/2025

Pharmacy context and inspection background

This community pharmacy is located inside a medical centre in the Thetford in Norfolk. It provides a variety of services including dispensing of NHS and private prescriptions and the Pharmacy First and flu vaccination services under Patient Group Directions (PGDs). It also provides medicines in multi-compartment compliance packs to people who need extra support taking their medicines.

This was an inspection of the pharmacy which focused on the core Standards relating to patient safety. Not all the Standards were inspected on this occasion. The pharmacy was previously inspected in March 2016.

Overall outcome: Standards not all met

Standards not met

Standard 4.3

- The pharmacy does not always record fridge temperatures for medicines requiring cold storage. There are no fridge temperature records for the last three months. So, the pharmacy cannot be sure that medicines requiring cold storage are being stored at the correct temperature.

Standards that were met with areas for improvement

Standard 1.1

- The pharmacy has a set of standard operating procedures (SOPs), but these are overdue a review from several years ago. So, the procedures may not reflect current best practice. However, the SOPs appear to be robust and cover the services that the pharmacy provides, and the pharmacy has given assurances that the SOPs will be reviewed and updated as a priority.

Standard 4.2

- The pharmacy does not supply the patient information leaflets (PILs) with all multi-compartment compliance packs. And the pharmacy does not always include the necessary warning information required for certain medicines. So, people could be missing out on important information about their medicines. However, packs do have the dosage instructions and a description of the medicines inside printed on them. And the pharmacy has given assurances that going forward, all packs will be supplied with PILs, and all packs will have the required warning information.
