Pharmacy context and inspection background

This is a busy community pharmacy next to a large medical centre in the city of Sheffield. Its main services include dispensing prescriptions and selling over-the-counter medicines. The pharmacy provides NHS consultation services including seasonal vaccinations, Pharmacy First, and blood pressure checks. It delivers some medicines to people's homes.

This was a reinspection following an inspection in August 2024 where the pharmacy did not meet Standard 4.3. This reinspection mainly focused on the Standard which had previously not been met. Since the last inspection, the pharmacy has been monitoring the operating temperature of its pharmaceutical fridges daily to ensure the medicines inside them are stored at the right temperature. Pharmacy team members regularly complete a range of tasks to ensure stock medicines are stored correctly and are safe to supply to people. They record the mistakes they make during the dispensing process. And they share learning following these mistakes to help reduce the risk of similar mistakes occurring.
