Pharmacy context and inspection background

This is a community pharmacy located in a parade of shops in the city of Glasgow. Its main activity is dispensing NHS prescriptions. And it provides medicines in multi-compartment compliance packs to help people take their medicines at the right times. Team members provide advice on minor ailments and medicines use. The pharmacist provides some private services including a weight management service.

This was a routine inspection which focused on the core Standards relating to patient safety. Not all Standards were inspected on this occasion. The last inspection of the pharmacy was in July 2015.

Overall outcome: Standards met

Required Action: None

Standards that were met with areas for improvement

Standard 1.1

- The pharmacy has written procedures to support team members in their roles. And they implement new procedures when changes happen to services that they provide. But many of the written procedures were historic and overdue review. So, team members might not have the

appropriate up-to-date information to ensure they are following safe and agreed processes.

Standard 1.2

- Team members discuss mistakes which are identified during the dispensing process. But they do not consistently record these at the time they are identified. So, team members may miss opportunities to learn from things that go wrong.
