Pharmacy context and inspection background

The pharmacy is in a row of shops in the village of Springside in Ayrshire. It dispenses NHS prescriptions and sells a range of over-the-counter medicines. A large proportion of people accessing the pharmacy's dispensing services receive their medicines in multi-compartment compliance packs to help them take their medicines properly. The packs are assembled at an offsite hub within the same pharmacy group. The pharmacy delivers medicines to people's homes. Pharmacy team members provide other healthcare services including the NHS Pharmacy First Service.

This was an intelligence-led inspection of the pharmacy following information received by the GPhC. Not all the Standards were inspected on this occasion. The pharmacy was last inspected in November 2017.

Overall outcome: Standards met

Required Action: None

Standards that were met with areas for improvement

Standard 1.1

- The pharmacy has written procedures to support team members to help ensure it delivers its

services safely. But for the off-site dispensing of multi-compartment compliance packs these procedures do not reflect current practice. This means team members rely on each other's knowledge of the processes rather than having accurate procedures to refer to, and this increases risk.
