### Standards that were met with areas for improvement

#### Standard 1.1

- The pharmacy has Standard Operating Procedures (SOPs) for team members to follow. But its existing SOPs don't reflect some minor changes the pharmacy has made to its working practices. For example, the pharmacy has changed the way it dispenses and checks multi-compartment

compliance packs, and the SOPs do not reflect its new working arrangements. So there is a risk that team members may not refer to the most up to date procedures.
