Pharmacy context and inspection background

This is a distance-selling pharmacy (www.specialspharma.com) and mainly supplies specific controlled drugs. Medicines are supplied in the forms of apes, liquids, pastilles and dry flower to treat pain and mental health conditions. The pharmacy dispenses private prescriptions only. People using the pharmacy are based in the UK. The pharmacy is closed to the public and situated in a business park and medicines are delivered to people via courier.

This was a routine inspection of the pharmacy which focused on the core Standards relating to patient safety. Not all the Standards were inspected on this occasion. The pharmacy was last inspected in August 2023 and all standards were met.

Overall outcome: Standards met

Required Action: Not Required

Standards that were met with areas for improvement

Standard 1.1

- The pharmacy has undertaken risk assessments about its services, which outline most of the the

risks and mitigation taken to reduce the risks. However, the documented risk assessments do not cover all potential areas of risk associated the pharmacy's services. For example, they do not cover individual medicines or formulations supplied, unlicensed medicines, shortages, risk of abusing medicines online or fraudulent patient ID. They also do not cover how the pharmacy will tackle potential communications failures. By including these areas, the pharmacy would be able to better demonstrate that it understands the potential risks associated with its services and has adequate contingency arrangements in place.

Standard 1.6

- The pharmacy generally keeps the records it is legally required to maintain. However, some records were incomplete, including the responsible pharmacist record, which was missing several entries. The pharmacy also labelled and prepared medicines significantly earlier than the prescription date for postdated prescriptions, meaning the recorded dispensing date was earlier than the date the medicine was due.

Standard 2.2

- The pharmacy team members have the right training for their roles, but ongoing training is not regular or structured
