Pharmacy context and inspection background

This pharmacy is in a business centre unit on the outskirts of Cardiff. It is associated with Numan, a CQC-registered online prescribing service owned by Vir Health Ltd. The pharmacy's only service is dispensing private prescriptions for adults aged 18 and over, written by prescribers employed by the prescribing service. The pharmacy mostly supplies prescription medicines for weight loss, but also supplies medicines for erectile dysfunction, premature ejaculation, hair loss and low testosterone levels. People do not visit the pharmacy in person and medicines are sent by post or courier.

This was a reinspection following an inspection in September 2025 where the pharmacy did not meet Standard 1.1. This reinspection focused on those Standards which had previously not been met. The pharmacy demonstrated due diligence by seeking assurance that the prescribing service it worked with had implemented robust measures to minimise the risk of false or misleading information going unrecognised. It had satisfied itself that appropriate safeguards were in place to support safe and clinically appropriate prescribing.

Overall outcome: Standards met

Required Action: Not Required

Standards that were met with areas for improvement

Standard 1.1

- The pharmacy completes due diligence checks about the prescribing service it works with to help make sure prescribing decisions and subsequent supplies of medicines are safe. But it does not always gain assurances that the prescribing service's additional verification measures for patient weight and relevant health conditions are operating effectively for all prescriptions that are issued relating to weight management.
