Standards not met

Standard 1.2

- The pharmacy does not make records of mistakes that are made when supplying medicines. And it does not review patient safety issues. There is evidence that mistakes are being repeated as the pharmacy team have not implemented changes following errors and learned from them.

Standard 1.6

- The pharmacy does not keep accurate records of the supply of controlled drugs. And it does not promptly rectify discrepancies in running balances of stock held. This does not fall within the law and could increase the risk of diversion.

Standards that were met with areas for improvement

Standard 3.1

- There are areas of structural damage and dampness in areas of the building that could, in the future, present a significant risk to the safe operation of the pharmacy. Currently these areas are not being used for the provision on pharmacy services.
