Standards that were met with areas for improvement

Standard 1.6

- The pharmacy keeps the records it needs to by law, but information in the Responsible Pharmacist log and private prescription registers are sometimes inaccurate or incomplete which may compromise the audit trail. Records for some higher-risk medicines are not always checked as regularly as they should be. This means that errors or discrepancies might not be immediately

identified.

Standard 4.2

- The pharmacy does not always identify prescriptions for higher-risk medicines, so some opportunities to provide additional counselling and monitoring at the point of handout may be missed.
