Standards not met

Standard 1.2

- The pharmacy does not have a process for recording mistakes made during the dispensing process. This means it may be difficult for team members to understand the processes to follow in response to any mistakes made.

Standard 1.6

- The pharmacy does not keep a record of the responsible pharmacist on duty. And it does not display a notice of the responsible pharmacist on duty as required. This means it may be difficult for the pharmacy to know who was acting as the responsible pharmacist at a given time.

Standards that were met with areas for improvement

Standard 1.1

- Overall, the pharmacy provides its services safely. Whilst team members demonstrate the processes they follow to provide services safely, the pharmacy's written procedures have not been recently reviewed to show they reflect current practice. And not all team members have read the written procedures available. This may make it hard for the pharmacy to demonstrate it provides its services consistently.
