Type of pharmacy: Community

Date of inspection: 13/06/2025

Pharmacy context and inspection background

This pharmacy is located in a parade of shops on a busy road in Rainham, Essex. It does not provide any NHS services but dispenses medicines against private prescriptions and offers a delivery service. The pharmacy also sells pharmacy-only and general sales list medicines through its website and over the counter. The superintendent pharmacist is an independent prescriber and provides a face-to-face private prescribing service. The pharmacy is also registered with the CQC for prescribing in treatment of disease, disorder and injury and slimming clinic services. And it dispenses private prescriptions from a third-party platform used for aesthetic treatments. Enforcement action has been taken against this pharmacy, which remains in force at the time of this inspection, and there are restrictions on the provision of some services. The enforcement action taken allows the pharmacy to continue providing other services, which are not affected by the restrictions imposed.

This was a reinspection following an inspection in November 2024 where the pharmacy did not meet Standards 1.1, 1.6, 3.1, and 4.2. This reinspection focused on those Standards which had previously not been met and had been addressed by an action plan (Standards 1.1 and 3.1). Since the last inspection, the pharmacy had put in place risk assessments for online services. However, this does not cover all areas required by the GPhC guidance, so there are still improvements that can be made. And the pharmacy had removed medicines advertised for unlicensed indications from its website.

Overall outcome: Standards met

Required Action: None

Standards that were met with areas for improvement

Standard 1.1

- The pharmacy has now put risk assessments in place which outline the risks, mitigation and person responsible. But the risk assessments do not cover all areas of the service. For example, they do not consider any potential risks associated with dispensing when the superintendent pharmacist is also the prescriber. Or communication between staff and other parts of the service.
