Pharmacy context and inspection background

This is a pharmacy in the town of Prudhoe in Northumberland. It dispenses specially made medicines for people who require specific formulations of medicines. The pharmacy receives prescriptions directly from prescribers for a number of conditions including women's health and pain management. Some of the medicines the pharmacy dispenses are made in the pharmacy's compounding unit and the pharmacy obtains other medicines from a specials manufacturer and wholesaler associated with the parent company, PCCA. The pharmacy is closed to the public, people do not attend the pharmacy in person to collect their prescriptions. They are delivered to people via courier.

This was a desktop inspection following an inspection in February 2025 where the pharmacy did not meet Standard 1.2. The reinspection focused on the Standard which had previously not been met along with the areas for improvement identified at the previous inspection. The pharmacy has improved standards since the last inspection. It has completed a clinical audit of specially prepared medicines to ensure they are provided to people in a safe and effective way. And it has risk assessments that cover all the therapies it provides. The pharmacy has additional clinical information about dosage recommendations from prescribers available for the pharmacists to use when making their clinical checks on prescriptions.
