Pharmacy context and inspection background

This pharmacy is set in a stand-alone commercial property near a railway station. The pharmacy opens five days a week. It provides most of its NHS services at a distance. But people can visit its premises in person to have their blood pressure checked or if they want to buy a medicine over the counter. The pharmacy dispenses people's prescriptions. It delivers medicines to people in person. It supplies multi-compartment compliance packs to a few people who need help managing their medicines. And it delivers the NHS Pharmacy First Service by video link to help people who have a minor illness.

This was a full reinspection following an inspection in July 2024 where the pharmacy did not meet Standards 1.1, 1.2, 1.5, 1.6, 4.2 and 4.3.

Overall outcome: Standards not all met

Required Action: Improvement Action Plan

Standards not met

Standard 1.6

- The pharmacy doesn't do enough to make sure it keeps records in the way the law requires it to do so. These records include its controlled drug register, emergency supply records, private prescription records and its responsible pharmacist log.

Standards that were met with areas for improvement

Standard 4.2

- The pharmacy provides medicines in multi-compartment compliance packs to help people take their medicines. But patient information leaflets aren't routinely supplied. So, people may not always have up to date information about their medicines.

Standard 4.3

- The pharmacy doesn't have a robust expiry-date checking process in place for its stock medicines. This could increase the risk of someone receiving medicines which have expired.
