Pharmacy context and inspection background

This is a community pharmacy situated in a city suburb. Most of its activity is dispensing NHS prescriptions to people who live in their own homes and people living in care and nursing homes. And selling medicines over the counter. It also offers services such as the Pharmacy First service. And the substance misuse service.

This was the first routine inspection of the pharmacy since the pharmacy relocated in January 2024.

Overall outcome: Standards met

Required Action: None

Standards that were met with areas for improvement

Standard 1.1

- The pharmacy team members discuss dispensing mistakes when they are identified. And they record these in the near miss book. But there is not a robust process for regularly reviewing these

dispensing mistakes. So it may be harder for them to identify any patterns or trends and take effective action to help prevent any recurrences.

Standard 5.3

- The pharmacy mainly has the equipment and facilities it needs for the services it provides. But the pharmacy is using a non-calibrated measuring cylinder when measuring some liquid medicines. This means the pharmacy cannot be sure that the correct volume of liquid medicine is always supplied.

Principle 1: The governance arrangements safeguard the health, safety and wellbeing of patients and the public
