Pharmacy context and inspection background

This is a dispensing hub pharmacy situated in a mixed industrial unit. Most of its activity is dispensing NHS prescriptions. The pharmacy supplies medicines in multi-compartment compliance packs to people who live in their own homes and people who live in care and nursing homes.

This was the first routine inspection of the pharmacy.

Overall outcome: Standards met

Required Action: None

Standards that were met with areas for improvement

Standard 1.1

- The pharmacy has processes to ensure that medicines are dispensed safely. But it does not always have clear audit trails to show which team member has completed the tasks within the dispensing process. This could make it harder for the pharmacy to check who has been involved in the event of a future query.

Standard 1.2

- The pharmacy team members discuss dispensing mistakes when they are identified. But they do not always record these. So it may be harder for them to identify any patterns or trends and take effective action to help prevent any recurrences.
