Standards that were met with areas for improvement

Standard 1.1

- The pharmacy has written procedures for team members to follow. But they do not cover all of the services or activities undertaken at the pharmacy. And some team members have not read all of them. So team members may not be aware of all the procedures they need to follow to keep

processes safe.

Standard 1.2

- The pharmacy has a system for recording mistakes made during the dispensing process. But team members do not consistently record the mistakes they make, and do not record sufficient details about the mistakes or regularly review them. So they may miss opportunities to learn from the mistakes and help prevent them from occurring again.
