Standards not met

Standard 1.1

- The pharmacy has a risk assessment in place for the sale and supply of medicines online, and it generally only supplies these in small volumes. However it has not considered the potential risks for each individual medicine that is provided at a distance. This may make it harder for the pharmacy to identify and mitigate any particular risks associated with the sale of the individual medicines.

Standard 1.5

- The pharmacy cannot demonstrate that it has appropriate indemnity insurance to cover its services.

Standard 4.2

- The pharmacy does some identification checks for people accessing its services but these are not comprehensive. And it relies on the third-party site it works with to do part of the checks. So, it may be harder for the pharmacy to check the identity of people using the service and take necessary action where people are ordering more frequently than clinically required. The GPhC guidance for registered pharmacies providing pharmacy services at a distance including on the internet was updated after the inspection. The pharmacy must ensure that it complies with the updated guidance.
- The pharmacy cannot demonstrate that sufficient safeguards are in place to prevent repeat purchasing of cyclizine products.
