Pharmacy context and inspection background

The pharmacy is in a business unit in Middlesbrough town centre. It has a distance selling NHS contract. Pharmacy team members dispense NHS prescriptions and deliver them to people's homes. They provide medicines to some people in multi-compartment compliance packs. And they provide medicines to people living in care homes and nursing homes. People access services through the pharmacy's website, alchemy-direct.co.uk.

This was the first routine inspection of the pharmacy since it was registered in July 2024.

Standards not met

Standard 1.1

- The pharmacy doesn't have a set of standard operating procedures which always reflect the way team members work. For example, there has been no update to the dispensing procedure following the implementation of a patient medication record system which alters the way the

team dispenses. And the team do not always follow key aspects of the pharmacy's procedures. This includes for near miss recording and delivery of medicines.

Standard 1.2

- The pharmacy does not have adequately robust processes to record, monitor and learn from errors made whilst dispensing. This means team members may miss opportunities to identify repeated mistakes and make services safer.

Standards that were met with areas for improvement

Standard 4.2

- The pharmacy delivers all of the medicines it supplies. However, it does not keep robust audit trails of delivery attempts and completions. So, this could create difficulties when responding to queries relating to the delivery of people's medicines.
